

HOW TO SIDELOAD A .APK FILE TO YOUR OCULUS QUEST 2

Easiest directions for getting that .apk file loaded to your Oculus

1

Things You Need to Install .apk Files to Your Oculus Quest

- Facebook account
- USB cable
- SideQuest Account
- Oculus Mobile App
- Mac or PC with USB 3.0 port or higher
- The .apk file you wish to side load

Enable Developer Mode for Oculus Quest

- Open the Oculus Mobile app on your Phone
- Go to settings
- Select your Oculus Quest (make sure your Quest is powered on)
- Select More Settings
- Set up developer account from link
- Login with your Facebook and create a developer name
- Go back to Oculus 2 and select Developer Mode and enable

3

Create a SideQuest Account

- Go to sidequestvr.com and create an account
- Select Get SideQuest
- Download SideQuest (choose macOS or Windows)

4

Install the APK file on your Oculus Quest 2

- Connect your Oculus Quest to your computer with an USB cable
- Put on your Oculus Quest and allow Access Permissions
- Obtain an .apk file for install on your Oculus Quest
- Drag & drop the .apk file onto the SideQuest and wait for the installation to finish

5

Start the Installed App on Your Oculus 2

- Put on your Oculus Quest
- Tab the Apps Button or Library button (older software versions) in the Main Menu
- Tab Unknown Sources
- Start the app you just installed
